18. - 24. AUGUST 2017

CLIMATE-CAMP IN BONN

OUR ENVIRONMENT // OUR FUTURE // OUR RESISTANCE!

Our environment and therefore our future is in danger! Due to climate change, deforestation poisoning of the acres with pesticides, plastic and nuclear waste in sea and ground or the use of fossil energy sources such as coal and oil we are threatened by a global environmental catastrophe, which will endanger the life of humanity as a whole!

But: More and more people are becoming aware, that we can't continue like this – worldwide there is a growing movement for the salvation of the environment: More than 200.000 people protested during the climate summit 2015 in Copenhagen. In November of 2017 the climate summit COP 23 will take place in the WCCB in Bonn, which means, that the international protest will be to guest too!

As a kick-off for the protests in November we will organise a protest-camp and an action week in the centre of Bonn, which will take place from the 18th-24th. of August. During this „Base Climate Summit“ we want to educate one another, discuss and take practical action.

We want to show a societal alternative, in which we, even in 50 years, will still be able to breath clean air and hear the birds sing in the forests. We want to stand up for a world that is not shaped by greed for profit, environmental destruction, but instead by solidarity and environmental awareness.

DATES Fr. 18.08. | 4:00pm | Kaiserplatz, Bonn
KICK-OFF DEMONSTRATION: „SAVE OUR CLIMATE!“
Mi. 23.08. 19:00pm | at the Camp
**CLOSURE-DISCUSSION: „SYSTEM CHANGE, NOT
CLIMATE CHANGE?“**
